A. Books

1. Tepe Hissar. AVA-Materialien 14 (Munich 1982), ISBN 3-406-09739-1
Brief representation of the report of the old excavations and preliminary reports of the new ones.

2. P. Yule/G. Weisgerber, Samad ash-Shan, 1988 Preliminary Report /Samad ash-Shan, 1988 vorläufiger Bericht (Bochum 1988) 53 pages + 15 plates. 1993 translated into Arabic in mimeographed form and bound.
digital version: <http://archiv.ub.uni-heidelberg.de/propylaeumdok/volltexte/2010/470/> First report of the new excavations at Samad al-Shan which shows in a detailed way the characteristics of the find material particularly for Oman's late pre-Islamic period. Thereby the kinds of grave goods first became clear for the Samad period. European prehistoric research provides the research model.

3. Die Gräberfelder in Samad al-Shān (Sultanat Oman) Materialien zu einer Kulturgeschichte, Deutsches Archäologisches Institut, Orient-Abteilung, Orient-Archäologie vol. 4 (Rahden 2001), ISBN 3-89646-634-8

E. Haerinck, *AJA* 107, 2003, 301–302
D. Potts, *Bibliotheca Orientalis (BibOr)* 59, 2002, 644–647
Final report of the author's excavations at Samad al-Shan and other sites in the Sultanate. The cemeteries in Samad are the most intensively and extensively researched objects in central Oman for the late pre-Islamic period. This work documents the artefactual finds and their contexts. It includes a new reappraisal of the history and sociology of the late pre-Islamic history and archaeology. The main study object is the late (Samad) period, but in order to define it, one must define the early ones as well. Relative and absolute chronology attempted. Summaries in English and Arabic. It includes the skeletal analyses carried out by Manfred Kunter. The original research documents are archived in the German Mining Museum, Bochum.

Digital version: <http://www.journals.uchicago.edu/doi/abs/10.1086/422297>
This work catalogues the largest hoard find of copper artefacts to date from the Near East, most of which derive from the Early Iron Age. It complements the archaeological evidence from Samad al-Shan, which was researched parallel to it. The finds appear to have been stashed in an Umm an-Nar period tomb by robbers perhaps still in the 1st millennium BC.

H. Vogt, Rhein-Neckar-Zeitung 01.04.2008, 12
Anon., Universitäts Pressestelle, Universität Heidelberg
R. Hoyland, Bull. Soc. Arabian Studies 13, 2008, 48

This new account of the history, religion, art and economy of Late Antique Ḥimyar is aimed at an educated general readership. It is based on the excavations at ẓafār (one of the largest sites in Arabia) and includes a body of new visual materials, mostly in colour, but is not an excavation report. It synthesises archaeological, epigraphic and historic sources. Ḥimyar is divided into early, empire and late/post periods. New chronology for the visual arts.

6. Himyar–Late Antique Yemen/ حَمِيرَ اليمن القديم المتأخر , English and Arabic version, 2nd edition (Aichwald images and English text finished)

Expanded, updated and rewritten edition.

7. S. Japp/P. Yule, Sculpture in the ẓafār Museum, in preparation

This is the publication of the sculptures housed in the site museum at ẓafār.

8. Old South Arabian Coins in European Collections, in preparation

This monographic study reevaluates the Old South Arabian coins in European collections by means of the study published in 2003 by S. Munro-Hay.

9. P. Yule (ed.), ẓafār, Capital of Ḥimyar, Rehabilitation of a 'Decadent' Society, Excavations of the Ruprecht-Karls-Universität Heidelberg 1998–2010 in the Highlands of the Yemen, in preparation.

Final synthesis of the fieldwork in ẓafār.

This is the final report of the mapping, excavation and documentation project of the Early Bronze Age (Umm an-Nar period) tower tombs at Shir/Jaylah. Documentation includes excavation, photogrammetry and aerial photography.

45. Early Iron Age Pottery of Central Oman in the CD publication, M. Mouton and F. Carrez (eds.), Assemblages céramique des sites de l'âge du fer de la péninsule d'Oman (Lyon 1998), ISBN 2-903264-85-6

Workshop report in which the Early Iron Age finds from different sites mostly in the United Arab

Emirates are discussed with the intention of presenting a synthesis of the finds.

46. P. Costa/G. Costa/P. Yule/M. Kunter/C. Phillips/A. al-Shanfari, Archaeological Research in the Area of Muscat (Sultanate of Oman) 1981, 1982, 1991, in: *Orient-Archäologie* =(OrAr) 2, 1–90

Publication of the Early Iron Age honeycomb cemetery and various graves at Bawshar.

47. A Prehistoric Grave Inventory from Aztaḥ, Ḥafār, in: OrAr 2, 91–96

Study of a rare grave assemblage of metallic weapons and large stone beads from the South Province of Oman

48. P. Yule/G. Weisgerber, The 1996 Season of Excavation in the Sultanate of Oman, in: OrAr 2, 97–117

This study attempts to better define the transition from the latest Early Iron Age to the earliest Late Iron Age at al-Maysar. The second half deals with our excavation at Rākī near Yanqūl.

49. ‘Amlah, al-Zahirah (Sultanat Oman) – späteisenzeitliche Gräberfelder 1997, in: OrAr 2, 119–186

The author describes the close connections of the artefacts in terms of their types with those of the late pre-Islamic period in the UAE.

50. P. Yule/C. Bergoffen, East of ‘Ibrī: A Jahil in the Sharqīyah, in: OrAr 2, 187–193

The authors investigate a folktale for the first time about the builder of the stone tower tombs near Shir. As recounted, half of the body lies in one tomb and the other half in a second one. The protagonist of the story is perhaps of recent origin.

digital version: <http://archiv.ub.uni-heidelberg.de/propylaeumdok/volltexte/2010/472/>

The study of the dentitions from Samad al-Shan begun by Karen Højgaard, was finished by J. Lukacs and his colleague, G. Nelson. This verified the nutrition of the Samad population.

52. The Samad Period in the Sultanate of Oman, *Iraq* 61, 1999, 121–146, ISSN 00210889

digital version: <http://archiv.ub.uni-heidelberg.de/propylaeumdok/volltexte/2010/476/>

New synthesis and summary in English of the excavated findings from Samad al-Shan aimed at an English-reading public.

53. A Bronze Bowl from the Back Country of the Sultanate of Oman, J.-W. Mayer/M. Novák/A. Pruß (eds.) *Festschrift W. Orthmann*, (Frankfurt/M 2001) 494–509, ISBN 3-00-007995-5

Publication of one of the decorated bronze bowls excavated from ‘Amlah/al-Fuwaydah. The relations of the motives and restoration of the vessels are discussed.

54. The Hasat Bani Salt in the al-Zahirah Province of the Sultanate of Oman, eds. R.M. Boehmer/J. Maran, *Lux Orientis Archäologie zwischen Asien und Europa FS Harald Hauptmann* (Rahden 2001) 443–450, ISBN 3-89646-392-6

digital version: <http://archiv.ub.uni-heidelberg.de/propylaeumdok/volltexte/2008/132/1>
First complete documentation of Oman's largest and most interesting pre-Islamic rock relief. A dating in the Samad period is tentatively suggested. This site is shown in its topographic context.

55. P. Yule/I. Guba, Did the Ancient Mesopotamian Royal Stone Originate in Oman?, *Adumatu* 4, 2001, 41–51, ISSN 1319-8947

digital version: <http://archiv.ub.uni-heidelberg.de/propylaeumdok/volltexte/2008/130/>
Intensive study of the definition of diorite and gabbro as stones used for royal imagery in early Mesopotamia. The study rests on close-up photos taken of statues in the Louvre and field samples from Oman. The origin of the royal stone in Oman is unclear since this same stone exists in Iraq. The stone of the statues derives from a variety of sources and it heterogeneous.

The literature generally characterises Ḥimyar and its material culture as decadent, especially the visual arts. At the time when most such literature arose, few finds were published from this period. The characterisation is disputed in light of the newly excavated finds excavated from Ẓafār.

Studies presented for different parts of the Sultanate of Oman. These include the Samad Assemblage and Iron Age in the South Province Dhofar. The final report for the late Early Iron Age cemetery at Bawshar appears as a chapter in this book. The excavation records had remained unpublished for nearly 20 years. The discovery of the Northern Late Pre-Islamic Culture at 'Amlah and al-Baruni established interconnections with the late pre-Islamic sites to the north in the U.A.E. Finally, the mythical builder of the tower tombs was investigated.

Comprehensive catalogue with good documentation and analysis of the provenance and use mostly of metallic hoard artefacts based on European research models. Four regional hoard areas are defined in terms of artefact type. The author distinguishes recoverable from non-recoverable hoards as a means of interpreting the meaning of these finds. Few hoard finds, if any, show use wear. Most are ergologically useless as tools and weapons. The original documentation for this research is archived in the Peabody Museum, Harvard University.

This dissertation deals with the chronology of the seals Early and Middle Minoan Periods. It creates typologies for motifs, forms, materials and syntax of the seals before assigning many to style-groups.

175. On the Date of the Hieroglyphic Deposit in Knossos, *Kadmos* 17, 1978, 1–7
The author argues for a MM IIB dating for the Hieroglyphic Deposit in Knossos by virtue of stratigraphy and seal style.

176. Platanos Tholos B in Kreta: Bemerkungen zu den Siegeln, *Marburger Winkelmann-Programm* 1978, 3–5
A seal of Old Babylonian type found in Platanos tholos B is of little value in dating this tomb and its contents.

177. Two Seals of the 'Hieroglyphic Deposit Group' from Gournia, *Temple Univ. Aegean Symposium* 4, 1978, 51–56

Seals of the Hieroglyphic Deposit Group form a group in terms of style, subject matter and technical quality. The author attempts to date two seals by assigning them to this group.
